

FISHING BOATS

2000

There's a lot And, there are a lot

That presents you with a lot of choices to make about what to catch and where to find it. But the choice of what boat to chase down all those fish with is easy:

You'll find Sylvan offers you a variety of models to choose from, each one designed to make fishing for nearly any species, in all types of water, as effortless and enjoyable as possible. Fully loaded, professional-style boats, economical multi-purpose boats, simple car-toppers and Jon boats; the choice is all yours.

Are you choosing features? Inside your Sylvan, you'll find the kinds of practical, intelligent features that make each fishing trip a pleasure. Like lighted livewells and rod storage compartments. Lots of fish-fighting room. Built-in tackle trays. Multiple battery

storage locations. Storage up front, in and under the consoles, along the sides and in the back. And, enough seat bases for the whole crew to move their seats around until everyone is comfortable.

Maybe you're choosing a well-built boat. Again, Sylvan is the easy choice. Our seamless, one-piece bottom combines with our rock-solid rib structure to provide your Sylvan with a powerful foundation to take on the roughest of waters. Add in our five-keel construction, thick bottoms and sides, and the treated plywood floor with a lifetime warranty, and you've got a boat that's built for years of rugged dependability.

And, if you think we've forgotten those whose fishing boat of choice comes in

of fish out there. of places to go fishing.

fiberglass, think again: each model in our Viper series is a sturdy, powerful serpentine predator. You'll find plenty of fish-catching features coiled up inside, and the strong hull is set up to take a pounding. Plus, the dual and single console glass-liner boats make quick work of cleanup after an action-packed day.

No matter which Sylvan is your choice, you and your family will be able to relax and enjoy it for years to come. We thoroughly leak test every boat we make, and our exacting level flotation tests meet or exceed federal requirements. And, we back our boats with

warranties that are among the most solid in the boating industry.

Boating is far more than just a business to us; it's our choice for a way of life. Just like you, we enjoy the pre-dawn tranquility, drifting atop a dark blue mirror, the serene silence broken only by the gentle whirring of our rod whipping forward, the lure quickly disappearing into the early light, then a soft, distant plunk as it goes to work. It's that kind of moment that guides us to build the boats we do, and why we build them the way we do.

*It's why Sylvan
is the boat of choice.
And, why it's the right choice.*

MERCURY
The Water Calls

Take a look at

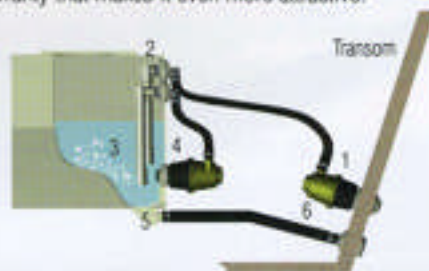

Rock-solid rib construction

Enjoy a solid foundation that gives you and your family a boat that will easily handle any kind of water. The superb strength and performance of your Sylvan boat starts with our seamless one-piece bottom, which provides increased hull integrity. The rock-solid rib structure features .100-gauge, hand-formed ribs on 10" centers, giving your Sylvan incredible lateral strength and rigidity. Up to eight hat-shaped ribs back up the rugged hull. With a hull this strong, you'll be ready for anything.

Treated flooring

Long-lasting beauty and strength are right under your feet. You'll enjoy solid support for a lifetime in your Sylvan because we build our floors with specially treated XL plywood that won't warp or rot. We also provide a lifetime warranty on the floor, giving you years of maintenance-free enjoyment. Then, we cover the floor with thick, luxurious marine carpet that complements your boat, giving you an eye-pleasing interior. Durable and easy to clean, the carpet comes with a five-year warranty that makes it even more attractive.

Flow Rite livewell system

The fish won't mind getting caught when you put them in your Sylvan's Flow Rite livewell system. The fill pump (1), which can be operated manually or on a timer, draws in water and pumps it into the livewell, where it circulates at the bottom of the tank. An air hole in the top of the fill pipe (2) mixes air with the water to create the aeration necessary to keep the fish happy and healthy (3). When the livewell is full, a separate recirculating pump (4) works in a continuous loop to keep aerated water moving in the livewell, even while heading back to the weigh-in or trailering. Extra water drains out the overflow, located on the side of the boat. For easy cleaning, the livewell has a bottom drain (5) with the drain hose running through the transom, not the floor (6).

Why Sylvan is the Boat of Choice

Lighted rod storage

You've got to be prepared for anything, so you need to take along lots of rods. Knowing that, we've provided plenty of rod storage to keep everything organized. The long, lockable rod boxes feature large openings for easier rod placement. Plus, many rod boxes now include lights, so you can find the right rod when fishing at night. You might say we help lighten your load.

Lighted livewells

You won't have to worry about losing your catch in the dark, because the spacious, aerated livewells in your Sylvan feature a built-in light. The fish will be kept cleaner and healthier, especially with the Flow Rite system found in most models, which include timers and recirculating pumps to help keep the water fresh. Foam-backed lids provide superb insulation, and control switches on the dash and on panels close to each livewell mean convenience for you.

Fisherman's top

When the weather changes, we've got you covered. A fisherman's top, complete curtain package and bow cover are available for most models. Whether it starts to rain or you just want a little shade, the top and curtains go up easily and quickly. Depending on if you want a cool breeze blowing in or you're keeping water out, the curtains zip open or shut, and the top also comes with a boot for easy storage. The bow cover will keep debris from littering your bow so it stays clean.

Gull wing hull

Most Sylvan boats feature the time-tested, dependable gull wing hull, which is used throughout the boating industry. This deep-V hull, designed by the same people who work in Sylvan's R & D section, gets you on plane quicker than a standard-V hull. Its shape provides better transom lift, so you're out of the hole and on plane faster. You'll also be able to run smoothly on the last three feet of the hull, the area a properly trimmed boat should run on, allowing the engine to perform more efficiently and reducing fuel consumption. The gull wing hull is also more stable than other hulls, providing you with the same excellent performance and handling at full throttle as a luxury car. When fishing, you don't rock back and forth when moving around in the boat while in choppy water.

Sylvan Clothing

Complete your boating wardrobe with Sylvan shirts, jackets and hats.
For more information, send an e-mail message to service@sullivanssportswear.com.

Limited Warranty

Sylvan warrants each new fiberglass hull for a period of five (5) years, and each new riveted aluminum hull for a period of ten (10) years, from the date of purchase by the original purchaser (based on years of use, under normal recommended operating conditions) as described in the warranty folder. A copy of the Sylvan Limited Warranty is attached to each new Sylvan boat, or may be obtained from any Sylvan dealer or the Sylvan factory.

Optional equipment is shown in some photographs used in this catalog. Please confirm standards and options with your dealer. All warranty information is available from your Sylvan dealer or directly from Sylvan Marine. Please write for more information.

Note: In our continuing efforts to build the best quality boats at affordable prices, it may become necessary during the course of the year to change specifications or materials used in construction. We reserve the right to make changes without prior notification.

Be sure to ask your dealer about our pontoon and fiberglass boats.
