SYLVAN PONTOON BOATS

A GATES

For maximum safety, you'll find pinch-proof protectors and Posi-Lock® latches on the gates of all our pontoons, as well as heavy-duty gate stops.

B DECK

We have so much confidence in our floors that they carry a lifetime, transferable warranty. Every pontoon features 3/4" Marineteck PTP 7-ply pressure-treated plywood that won't warp or rot. And the floor is securely through-bolted and screwed to the hat channels for a powerful hold.

C CARPET

Our seamless plush pile carpet (up to 28 oz.) is made of 100% U.V. stabilized polypropylene and has a five-year warranty. For extra durability, we bond it to the deck with marine adhesive and 200 lbs. of rolling weight, while stainless steel staples secure it to the perimeter of the deck.

D SPACERS

Our pontoons feature 3/8" spacers between the fence bottom and the deck, allowing water to drain easily and cutting carpet drying time in half.

E FENCING

Your pontoon's fencing is as attractive as it is durable, thanks to the .030 smooth aluminum panels which are foam-backed to prevent rattling and feature supplemental cross members for added strength. Powder coated railings provide a cleaner look.

F TUBE CONSTRUCTION

Because so much is riding on the tubes, we back ours with a lifetime warranty. Unlike other manufacturers', our tubes are heavy gauge (.080) with welded chambers to keep the pontoon afloat even if a section becomes punctured, and they feature rear anti-electrolysis drain plugs for easy draining. In addition, our air-filled tubes make the pontoon lighter, giving you more power and better fuel economy.

G NOSE CONE

Our nose cone knifes cleanly through the water, with two 13" fins deflecting water away from the boat, giving you a smoother, drier ride. The anti-puncture skid bar runs the entire length of the tube for added protection and steering control. And an extruded aluminum cap adds strength to the cone and protects you from sharp edges.

RPT TUBES There's a secret to Sylvan pontoon's superior speed. It's our unique RPT or Revolutionary Planning Technology tubes. There are no other dual or triple tube pontoons that can match them for speed and trim ability. Our 25-inch RPT tubes help our pontoons slice through the water with less resistance for cleaner trim and greater speed.

STANDARDS & OPTIONS	16

"V" TRANSOM

Our all-aluminum "V" transom carries a lifetime warranty and is designed to reduce spray and prevent cavitations in turns. Fins work to provide the optimum lift for better water flow and faster speeds.

FULL-LENGTH KEEL/SKID BAR

Our tubes feature a 1/2" aluminum keel running the full length of the tube. This provides maximum protection for the tubes while trailering and serves to deflect debris, enhance steering, and help prevent drifting.

ALUMINUM BOTTOM SKIN

Select pontoons feature our aluminum bottom skin, for a smoother glide that helps your engine operate more efficiently and saves you fuel, even at higher speeds.

LOUNGE FURNITURE

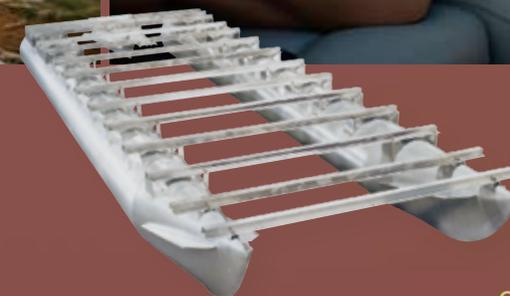

The comfort and durability of our lounge furniture starts with reliable rotocast bases which provide dry underseat storage areas. Our thick foam padding is treated with biocide, and our 33 oz. high-grade marine vinyl features a stain resistant topcoat that protects the beauty of the furniture for years to come.

HALF CAMPER

FULL CAMPER

CROSS CHANNELS

There's no substitute for a strong foundation. And that's exactly what you get with our 8' (or 8.5') x 6" x 1/8" aluminum hat channels, with heavy-duty 1/4" rear hat channels providing extra support for the motor. Our channels are double through-bolted onto deck risers every 24" for exceptional support and structural integrity. This unique design actually doubles the amount of z-channels found in other pontoons.

NOTE: Because weight distribution is extremely important when operating a pontoon boat, passenger weight should be distributed evenly for best overall performance. Also keep in mind that a four-stroke engine is much heavier than a two-stroke engine, significantly increasing the weight load in the stern. Check with dealer for performance evaluation and weight differential for four-stroke and two-stroke engines.
