THRILL RIDE

EXCLUSIVELY FROM SYLVAN

Game-changing Sylvan performance rides on RPT Revolutionary Planing Technology tubes. The "V" shape allows the pontoon to lift and plane across the water with sportboat-style speed and handling. In fact, you get increased top speed per horsepower and dramatically improved fuel efficiency — which is perfect for great days of tow sports and cruising.

And now, you can upgrade to our all-new PR25 Performance Package for an even better experience. Developed for use with a removable ski pylon, this package features an extended center transom and 60-gallon fuel tank to provide increased fuel capacity for a larger or XL shaft engine.

Whichever package you choose, keep your investment looking showroom clean with the new painted tube option. A combination of zinc chromate primer and urethane paint chemically etches into the aluminum to form a corrosion-resistant surface.

Thanks to RPT and PR25, a Sylvan pontoon isn't just the best of both worlds of spaciousness and performance. It's a whole new level of wow.

THEIRS | Pushes through water resistance

OURS | Lifts and planes across the water

PAINTED FOR PROTECTION.

Sylvan pontoon tubes are constructed with up to .100 gauge one-piece marine-grade aluminum. And now, with the painted tube option, you get the added durability provided by a combination of zinc chromate primer and urethane paint, which forms a corrosion-resistant surface.

COMFORT

Everything about a Sylvan pontoon is designed for maximum comfort and convenience. To begin with, our innovative floorplans are spacious, flexible and perfect for entertaining family and friends. And you won't find ordinary boat furniture on a Sylvan — our plush, overstuffed loungers create a luxurious living room on the water.

Furniture | Sylvan furniture uses only the finest quality, marine-grade vinyl with a stain resistant topcoat. Choose the floorplan with your favorite combination of lounge seating, helm chairs, sundeck and oversized rear loungers.

Floorplans | Sylvan gives you more spacious floorplan configurations to fit your lifestyle. Select series offer versatile rear lounge models, stylish port seating models with two high-back helm chairs, and bar models that are ideal for entertaining.

CHOICE

Virtually every aspect of a Sylvan pontoon can be chosen to create a boat just for you. From our wide range of innovative floorplans, to great options and packages, to flooring and colors — it's all up to you.

Flooring | Sylvan pontoons offer a wide range of floor and carpet selections, including woven vinyl and vinyl teak options.

Colors | Sylvan gives you the freedom to choose your combination of colors for the panels, accents and bimini top.

Painted Tubes | The S Series gives you the choice of standard or painted tubes, which combine zinc chromate primer and urethane paint to chemically etch into the aluminum, forming a corrosion-resistant surface.

*See pages 30-31 for all of your color and flooring options.

A. Constructed for Endurance | 3/4", 7-ply pressure treated plywood through-bolted and screwed to the hat channels to create the strongest seams in the industry.

B. Hat-Channel Construction | It all begins with .250 (heavy) and .125 (standard) gauge aluminum hat channels that are 6" wide and secured with 8 bolts spanning across our 6" wide deck risers. This creates the widest base in the industry and gives our pontoons greater stability without adding unnecessary weight. Combine that with a .190 gauge aluminum transom that's through-bolted with up to 20 bolts and footed deck risers that prevent tube fatigue, and you see why Sylvan backs its industry-leading construction with a Limited Lifetime Warranty on every product.

C. Fence & Railing | Features foam backing to prevent rattling and fully welded and anodized railing to add strength. Anodized welds are never painted. It's all backed by a 6-year warranty.

D. Thru-Bolted Transom | Made of up to .190 gauge aluminum and supported with up to 20 stainless bolts to handle today's higher horsepower engines.

E. 4-PT Deck to Hull Fusion | Sylvan deck brackets have 4 points of fusion for an extended area of contact with the tube. In addition to providing increased strength and support, this reduces frame twist and racking in rough water and guards against tube fatigue.
